

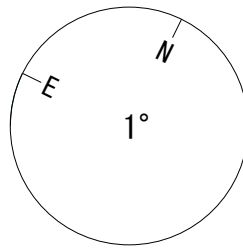

PHOTOGRAPHIC MAP VIRGO GALAXY CLUSTER

Captured on April 14, 2012 with a Zeiss Sonnar
135mm and an EOS 350D on La Palma. LM = 16mag
Green channel of a stack of 16 x 4min exposures.
Galaxies labeled down to 13mag.

For a visual tour of the cluster the 5mag star
6 Com on the right border is a good starting point.
It is conveniently placed 6 degrees east of β Leo.

4388 = NGC4388
86 = M86
